

# PREREQUISITES

TEAM ID : PNT2022TMID06411

PROJECT NAME : IoT based smart crop protection system for  
Agriculture

## SOFTWARE

The image displays two screenshots of a Python IDE (IDLE Shell 3.11.0) running on a Windows 10 desktop. The top screenshot shows the initial state of the shell with the prompt 'Python 3.11.0 (main, Oct 24 2022, 18:26:48) [MSC v.1933 64 bit (AMD64)] on win32'. The user has entered the command 'print("Hello world")' and the output 'Hello world' is displayed. The bottom screenshot shows the same shell after the user has entered the command 'print("Hello world")' and the output 'Hello world' is displayed. The Windows taskbar is visible at the bottom of both screenshots, showing the search bar and various application icons.

```
Python 3.11.0 (main, Oct 24 2022, 18:26:48) [MSC v.1933 64 bit (AMD64)] on win32
Type "help", "copyright", "credits" or "license()" for more information.
>>> print("Hello world")
Hello world
>>>
```
